

# 8" HYDRAULIC SUBMERSIBLE VORTEX FLOW TRASH PUMP

## MODELS

### S8T

8" (200 mm) Discharge

The S8T is a vortex flow pump designed to provide reliable high volume pumping on jobs ranging from wastewater to sewage to sludge and debris laden applications. Its ability to pass large semi-solids allows more shear sensitive materials to be pumped with less degradation.

## FEATURES

- Recessed Vortex Impeller (will pass 7" semi-solids)
- Compact Design allows this pump to fit through a 34" opening
- Variable Speed hydraulic drive provides a wide range of performance
- Oil Lubricated Seals (can run dry)
- High Efficiency Balanced Vane hydraulic motor
- Can be bolted directly into a pipeline or used as a booster pump
- Safe Hydraulic Drive can be used where electric power is hazardous or impractical
- Operates with our HT100 to HT150 power units or other hydraulic power sources capable of flows of 50 - 70 GPM
